Implementation is what we do.

The SISEP Center uses the science and practice of implementation and improvement sciences with our Technical Assistance (TA) activities to ensure sufficient attention is given to sustainability, scaling, and efficiency. Specifically, our TA approach is based on the Active Implementation Frameworks.

Implementation is what we do.

Rebekah Hornak

The celebration of starting a new academic year is over and we are now into the daily routine of supporting teachers, making 1,000 decisions a day, and teaching to the hearts and minds of our students. As a result of the constant demands, when we begin to learn about implementation science and practice, we view the approaches and strategies as 'something else' we have to do. But in reality, no matter your role in the K-12 setting, you are part of implementation every day.

Webinar Follow-up

Implementation Supports in Education

On Wednesday, October 4th, 2023, the SISEP Center hosted a free webinar on the current state of implementation supports in education. Sophia Farmer, Co-director of SISEP, facilitated a conversation with our guests from the Wisconsin Department of Public Instruction and the University of Washington SMART Center. What an amazing hour filled with stories and relatable experiences with implementation!

Four very basic ways to think about policy in implementation science

Jonathan Purtle, Corrina Moucheraud, Lawrence H. Yang & Donna Shelley

Policy is receiving increasing attention in the field of implementation science. However, there remains a lack of clear, concise guidance about how policy can be conceptualized in implementation science research. Building on Curran's article "Implementation science made too simple"—which defines "the thing" as the intervention, practice, or innovation in need of implementation support—we offer a typology of four very basic ways to conceptualize policy in implementation science research. We provide examples of studies that have conceptualized policy in these different ways and connect aspects of the typology to established frameworks in the field.

Why Meetings Suck and How to Fix Them

WorkLife Podcast - Adam Grant

Meetings often drain our joy and sap our focus – and meeting overload kills productivity. So why do we have so many of them, and is a better world possible? Adam investigates the science of improving meetings and explores how workplaces are fighting meeting bloat.

Available transcripts for WorkLife can be found at go.ted.com/WLtranscripts.
